activu® vis|ability + **omnilert®**

A.I. Visual gun detection & critical collaboration for Real-Time Crime Centers & Emergency Operations.

24/7 threat vigilance via any video feed

Identify threats, seamlessly, within your common operating picture.

Omnilert Gun Detect, integrated with Activu vis|ability, is the only Command Center platform anywhere which proactively identifies threats while maintaining superior context within a command center.

Any visual information, documents, video, dashboards and more can be grouped with *Omnilert* gun detection alerts in vis|ability, to ensure teams coordinate responses with high intelligence and high confidence.

Automate dashboards of critical information before an event occurs.
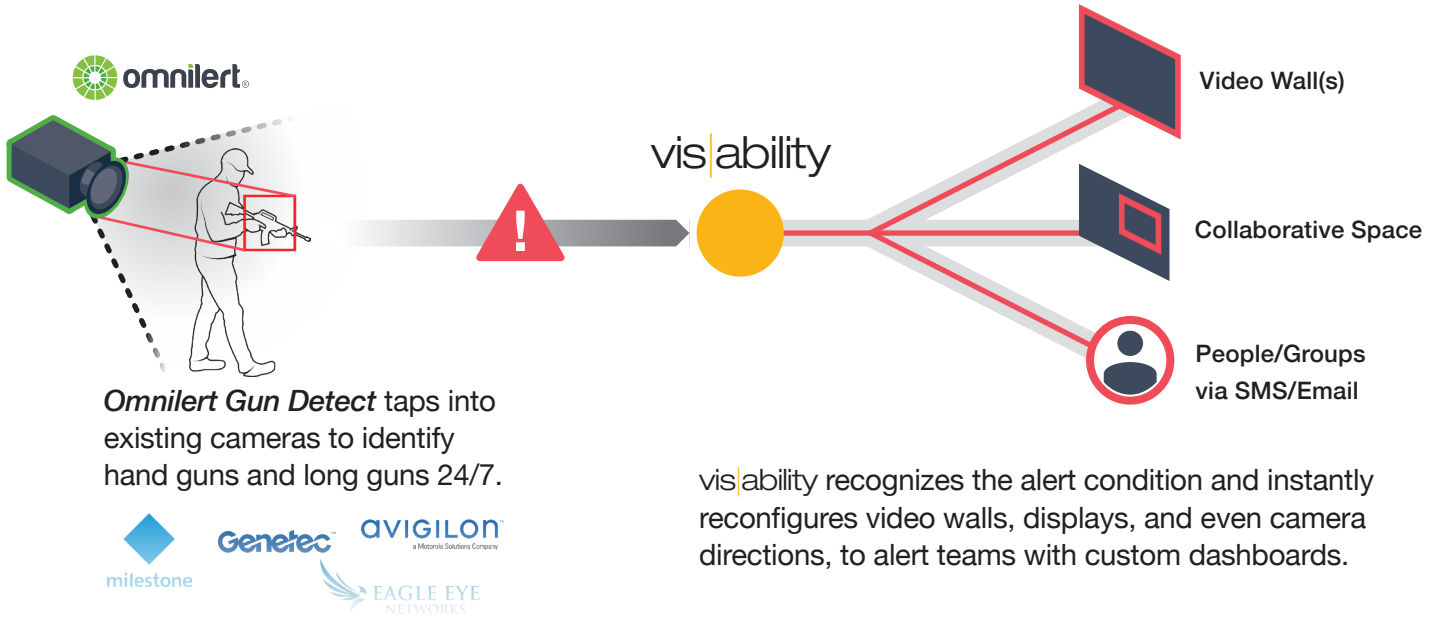

Omnilert Gun Detect in vis|ability takes readiness to new levels with smart video walls and virtual command centers. Team fatigue is reduced through use of *Omnilert's* AI-powered, always-on monitoring of gun threats, combined with dashboard automation enabled exclusively through vis|ability. Together, these platforms keep vigilant watch over areas of interest, and when a threat is detected, instantly configure video walls and alert key teams with dashboards of situational intelligence from *Omnilert*, along with other relevant information.

Share real-time monitoring and threat information to remote and mobile assets.

What good is real-time information if its stuck in a control room on a video wall? vis|ability opens your common operating picture to collaborating teams, wherever they are: workstations, conference rooms, remote, and mobile. Share *Omnilert* intelligence, combined in dashboards of additional relevant information, simultaneously to teams on site and at the command center.

activu

The Most Complete RTCC & EOC Video Wall and Critical Collaboration Solution.

Activu makes any information visible, collaborative, and proactive for people and control rooms tasked to monitor critical operations, real-time cameras, monitoring applications, and more. Activu customers seamlessly see, share, and respond to events in real-time, with context, to improve incident response, decision-making, and management.

Activu software, systems, and services set the standard for Public Safety and other critical professions, benefitting the daily lives of billions of people around the world. Over 1,000 control rooms depend on Activu to keep the world moving, and secure.

.

omnilert

The Only Visual Gun Detection Solution with Automated Response and Emergency Notification.

A leader and innovator in Emergency Communications since 2004, *Omnilert* is now the only technology platform to integrate visual gun detection for gun violence prevention and public safety. *Omnilert's* proprietary technology can identify guns in a wide range of environments, from dimly lit hallways to crowded outdoor spaces.

Unlike simplistic image recognition, *Omnilert Gun Detect* offers a multi-step verification process that recognizes a body, then looks for a gun and the physical behavior consistent with gun violence. Omnilert is a critical resource helping secure schools, office buildings, government facilities, and more.
