

vis|ability® enables critical operations teams to recognize incidents promptly and collaborate with relevant, real-time information anywhere people need it to resolve incidents faster.

## vis|ability for Public Safety

Automate  
your common  
operating  
picture

Reduce reaction  
time to zero.

Tech advancements and AI-enabled tools are transforming operations for law enforcement, fire departments, emergency operations centers (EOCs), HAZMAT, and FEMA.

vis|ability revolutionizes management of the overwhelming influx of data common in command centers today. The software platform enhances emergency situational awareness and response through real-time video and content from any platform, enabling AI-based gun detection in schools, public transit, & crowds, and other incident detection via crowdsourced data platforms.

### Highlights

- Integrates with virtually any monitoring & information platform, including Waze, Omnilert, & ServiceNow.
- Enables sharing & collaborating across Public Safety teams and agencies.
- Share content from any location via laptop, iPad, or mobile phone.
- Expansions made easy, whether in a new building, room, or office.
- Eliminates hardware-based video wall processors.
- Single, Mission-Critical 24x7 support model.
- Lower cost redundancy & upgrades.

# ● vis|ability

## Next-Gen Unified Response

vis|ability consolidates networked assets into a collaborative, user-friendly interface. Automatically building a customized view of incidents based on real-time information, vis|ability's hardware-light design enables unmatched flexibility for access on various

devices inside the command center or in the field. Key benefits of vis|ability include easy access to saved content collections, and effortless screen-sharing among operators in control rooms, or virtually in the field, whether on a laptop or via mobile phone.

### Resolve Incidents Faster

### How it Works

From Real-Time Crime Centers coordinating with personnel in the field, to fire departments tackling forest fires, and Emergency Operations Centers managing significant events, vis|ability empowers seamless sharing of critical information in situa-

tions demanding immediate attention. Whether stationed inside or out of a control room, or in another coordinating agency, vis|ability unifies all networked assets into a single, user-friendly interface, accessible wherever duty calls.
